

# Hospital Management System

Enter Login HMS123

Enter Password 1144

Menu

1. Patient Record
2. Doctor Record
3. Inventory Record

## Patient Record

Make a class of patient .If we select 1 Add patient Record using Constructor

- Patient name
- Patient CNIC ID
- Patient Phone #
- Patient Blood group
- Patient Diseases
- Supervisor Name

## Doctor Record

Make a separate class of doctor .If we select 2 Add Doctor Record using Constructor

- Doctor ID
- Doctor Name
- Doctor Spec
- Doctor Experience
- Doctor Phone number

## Inventory Record

Make a separate class of Inventory .If we select 3 Add inventory Record using Constructor

- Total Inventory Items
  - Remaining items
  - Destroy Items
  - Used Items
- And Show the Inventory List

### 2 step

Update These Value according to user requirement using concept of constructor overloading.

And Show the difference between previous record and current record.

**Final Step:** Show all the data on Display screen
